INDEX TO VOLUME 64D

January to December 1960

A

Page

Adachi, S., Impedance characteristics of a uniform current loop having a spherical core ... 295
Admittance and radiation of an insulated slotted-sphere antenna surrounded by a strongly ionized plasma sheath ... 525
Amplifiers, parametric ... 751
Amplitude distribution for radio signals reflected by meteor trails ... 449
Amplitude-probability distribution of atmospheric radio noise from statistical moments, determination ... 49
Analysis of propagation measurements made at 418 megacycles per second well beyond the radio horizon (a digest) ... 225
Antenna data processing, automatic, bibliography ... 743
Antenna, half-wave cylindrical in a dissipative medium: current and impedance ... 365
Antenna, high gain, very low side-lobe, with capability for beam slewing ... 557
Antenna, impedance of a corner-reflector as a function of the diameter and length of the driven element ... 135
Antenna size, effect of on gain, bandwidth, and efficiency ... 1
Antennas, surface and leaky wave ... 746
Antenna surrounded by a strongly ionized plasma sheath, radiation and admittance of an insulated slotted-sphere ... 525
Antenna theory, cylindrical ... 569
Antenna, top-loaded monopole, the electric field at the ground plane with special regard to electrically small L- and T-antennas ... 139
Antenna, very-low-frequency, for investigating the ionosphere with horizontally polarized radio waves ... 27
Antennas 1957–1959 ... 731
Arctic communication, conference ... 73
Astronomy, URSI, report of U.S. Commission 5 ... 655
Athabasca Glacier, Alberta, Canada, electrical resistivity studies ... 439
Atmosphere, circularly stratified, focusing, defocusing, and refraction ... 287
Atmospheric bending of radio rays, methods of predicting ... 487
Atmospheric circulations and tropospheric scatter propagation ... 81
Atmospheric noise at various receiving locations, properties ... 640
Atmospheric radio noise from statistical moments, determination of the amplitude-probability distribution ... 49
Atmospherics, daytime attenuation rates in the very low frequency band ... 349
Atmospherics, very-low-frequency, measured frequency spectra ... 41
Attenuation measurements and standards, development ... 599
Aurora of October 22/23, 1958, at Rapid City, South Dakota ... 205
Automatic antenna data processing, bibliography ... 743

B

Bachynski, M. P., Propagation at oblique incidence over cylindrical obstacles. 311
—, *H. E. J. Neugebauer*, Diffraction by smooth conical obstacles ... 317
Balser, M., C. A. Wagner, Measurements of the spectrum of radio noise from 50 to 100 cycles per second ... 415
Basic experimental studies of the magnetic field from electromagnetic sources immersed in a semi-infinite conducting medium ... 21
Bean, B. R., E. J. Dutton, On the calculation of the departures of radio wave bending from normal ... 259
—, *G. D. Thayer, B. A. Cahoon*, Methods of predicting the atmospheric bending of radio rays ... 487
Beam-type low-noise microwave tubes ... 763
Berry, W. M., W. Q. Crichlow, C. J. Roubique, A. D. Spaulding, Determination of the amplitude-probability distribution of atmospheric radio noise from statistical moments ... 49
Bibliography of automatic antenna data processing ... 743
Bibliography on coherence theory ... 742
Bickmore, R. W., R. C. Hansen, Antennas 1957–1959 ... 731
Blevis, B. C., J. H. Chapman, Characteristics of 488 megacycles per second radio signal reflected from the moon ... 331
Bolgiano, F., Theory of wavelength dependence in ultra-high frequency transhorizon propagation based on meteorological considerations ... 231
Bremmer, H., On the theory of wave propagation through a concentrically stratified troposphere with a smooth profile ... 467

C

Calculation of the departures of radio wave bending from normal ... 259
Cahoon, B. A., B. R. Bean, G. D. Thayer, Methods of predicting the atmospheric bending of radio rays ... 487
Campbell, W. H., Natural electromagnetic energy below the ELF range ... 409
Carpenter, R. J., G. R. Sugar, G. R. Ochs, Elementary considerations of the effects of multipath propagation in meteor-burst communication ... 495
Cavities, refractometer, limit of spatial resolution ... 65
Channel capacity, loss in resulting from starting delay in meteor-burst communication ... 493
Chapman, J. H., B. C. Blevis, Characteristics of 488 megacycles per second radio signal reflected from the moon ... 331
Characteristics of 488 megacycles per second radio signal reflected from the moon ... 331
Circuits and waves, radio, URSI, report of U.S. Commission 6 ... 671
Circuit theory ... 687
Coastal deviation of high-frequency radio waves, measurements ... 57
Coding and theory, information ... 671
Coherence theory, bibliography ... 742
Communication, arctic, conference ... 73
Communication, loss in channel capacity resulting from starting delay in meteor-burst ... 493
Communication, meteor-burst, elementary considerations of the effects of multipath propagation ... 495
Communication, optimum frequencies for outer space ... 105
Computation and measurement of the fading rate of moon-reflected UHF signals ... 455
Concentrically stratified troposphere with a smooth profile, on the theory of wave propagation ... 467
Conference on arctic communication ... 73
Conical obstacles, diffraction by smooth ... 317
Contribution to the theory of corrugated guides ... 533
Core, spherical, impedance characteristics of a uniform current loop ... 295
Corner-reflector antenna as a function of the diameter and length of the driven element, impedance ... 135
Corrugated guides, a contribution to the theory ... 533
Crichlow, W. Q., Properties of atmospheric noise at various receiving locations ... 640
—, *C. J. Roubique, A. D. Spaulding, W. M. Berry*, Determination of the amplitude-probability distribution of atmospheric radio noise from statistical moments ... 49
Crombie, D. D., On the mode theory of very-low-frequency propagation in the presence of a transverse magnetic field ... 265
Cullen, A. L., Propagation of microwaves through a magneto-plasma, and a possible method for determining the electron velocity distributions ... 509
—, Surface-wave resonance effect in a reactive cylindrical structure excited by an axial line source ... 13
Current and impedance: half-wave cylindrical antenna in a dissipative medium ... 365
Cylinder of finite length, imperfectly conducting, response of a loaded electric dipole ... 289
Cylindrical antenna theory ... 569
Cylindrical obstacles, propagation at oblique incidence ... 311

D

Data processing, automatic antenna, bibliography ... 743
Daytime attenuation rates in the very low frequency band using atmospherics ... 349
Decker, M. T., H. B. Janes, J. C. Stroud, An analysis of propagation measurements made at 418 megacycles per second well beyond the radio horizon (a digest) ... 255
Defocusing, focusing, and refraction in a circularly stratified atmosphere ... 287
Depression-angle and polarization dependence of radar terrain return ... 483
Deschamps, G. A., Impedance measurements and standards ... 598
Detection theory ... 678
Determination of the amplitude-probability distribution of atmospheric radio noise from statistical moments ... 49
Development in attenuation measurements and standards ... 599
Diffraction and scattering ... 707
Diffraction by smooth conical obstacles ... 317
Dipole, loaded electric, response in an imperfectly conducting cylinder of finite length ... 289
Discharges, radiofrequency radiation from lightning ... 638
Drane, C. J., A bibliography of automatic antenna data processing ... 743
Duncan, P. H., F. A. Hinchey, Cylindrical antenna theory ... 569
Dutton, E. J., B. R. Bean, On the calculation of the departures of radio wave bending from normal ... 259

E

Earth-flattening procedure in propagation around a sphere, exact ... 61
Earth propagation, layered, in the vicinity of Point Barrow, Alaska ... 95
Effect of antenna size on gain, bandwidth, and efficiency ... 1
Effects of high-altitude nuclear explosions on radio noise ... 37
Electric and magnetic fields, studies ... 405
Electric field at the ground plane near a top-loaded monopole antenna with special regard to electrically small L- and T-antennas ... 139
Electric fields, ELF, from thunderstorms ... 425
Electrical properties of snow and glacial ice, measured ... 357
Electrical resistivity studies on the Athabasca Glacier, Alberta, Canada ... 439
Electromagnetic energy, natural, below the ELF range ... 409
Electromagnetic fields and plasmas, interaction ... 766
Electromagnetic radiation in magneto-ionic media ... 515
Electromagnetic signals, shielding of by a thin conducting sheet ... 563
Electromagnetic sources immersed in a semi-infinite conducting medium, basic experimental studies of the magnetic field ... 21
Electron content and irregularities in the ionosphere, the use of polarization fading of satellite signals to study ... 335
Electron velocity distributions, propagation of microwaves through a magneto-plasma, and a possible method for determining ... 509
Electronics, radio, URSI, report of U.S. Commission 7 ... 751
Elementary considerations of the effects of multipath propagation in the meteor-burst communication ... 495
ELF and VLF propagation research, a summary ... 647
ELF electric fields from thunderstorms ... 425
ELF oscillations and hydromagnetic waves in the ionosphere ... 650
ELF phenomena ... 383
ELF, possible application of the system loss concept ... 413
ELF radio waves, propagation and mode theory ... 387
ELF range, natural electromagnetic energy below ... 409
Elias, P., Information theory and coding ... 671
Energy, natural electromagnetic, below the ELF range ... 409
Engen, G. F., Radiofrequency and microwave power measurements ... 596
Exact earth-flattening procedure in propagation around a sphere ... 61
Exosphere ... 651
Experimental results from investigations of tropospheric propagation ... 615

Senior, T. B. A., K. M. Siegel, A theory of radar scattering by the moon ... 217
Sheath, radiation and admittance of an insulated slotted-sphere antenna surrounded by a strongly ionized plasma ... 525
Shielding of transient electromagnetic signals by a thin conducting sheet ... 563
Sideband, single, 600-mile-long ultrahigh-frequency tropospheric radio link, measured statistical characteristics and narrow-band teletype message errors ... 125
Siegel, K. M., L. B. Felsen, Scattering and diffraction ...
—, *T. B. A. Senior*, A theory of radar scattering by the moon ... 217
Siegman, A., Progress in solid-state masers ... 758
Signals, radio, reflected by meteor trails, amplitude distribution ... 449
Signals, transient electromagnetic, shielding of by a thin conducting sheet ... 563
Smith, R. L., Guiding of whistlers in a homogeneous medium ... 505
Smullin, L., Interacton between plasmas and electromagnetic fields ... 766
—, Low-noise beam-type microwave tubes ... 763
Snow and glacial ice, measured electrical properties ... 357
Some ELF phenomena ... 383
South Dakota, Rapid City, the aurora of October 22/23, 1958 ... 205
Space communication, outer, optimum frequencies ... 105
Spatial resolution of refractometer cavities, limit ... 65
Spaulding, A. D., W. Q. Crichlow, C. J. Roubique, W. M. Beery, Determination of the amplitude-probability distribution of atmospheric radio noise from statistical moments ... 49
Spectrum of radio noise from 50 to 100 cycles per second, measurements ... 415
Spetner, L. M., I. Katz, Polarization and depression-angle dependence of radar terrain return ... 483
Sphere, an exact earth-flattening procedure in propagation around ... 61
Spherical core, impedance characteristics of a uniform current loop ... 295
Sporadic *E* propagation, note on a test of the equivalence theorem ... 347
Standards and measurements, frequency and time interval, progress in the United States during the last three years ... 592
Standards and measurements, impedance ... 598
Standards and measurements, noise ... 601
Standards and methods, radio measurement, URSI, report of U.S. Commission 1 ... 591
Stanley, G. M., Layered earth propagation in the vicinity of Point Barrow, Alaska ... 95
Statistical characteristics and narrow-band teletype message errors on a single-sideband 600-mile-long ultrahigh-frequency tropospheric radio link, measured ... 125
Stone, M. L., S. J. Fricker, R. P. Ingalls, W. L. Mason, D. W. Swift, Computation and measurement of the fading rate of moon-reflected UHF signals ... 455
Storey, L. R. O., The joint use of the ordinary and extraordinary virtual height curves in determining ionospheric layer profiles ... 111
Stroud, J. C., H. B. Janes, M. T. Decker, An analysis of propagation measurements made at 418 megacycles per second well beyond the radio horizon (a digest) ... 255
Studies of natural electric and magnetic fields ... 405
Sugar, G. R., Loss in channel capacity resulting from starting delay in meteor-burst communication ... 493
—, *R. J. Carpenter, G. R. Ochs*, Elementary considerations of the effects of multipath propagation in meteor-burst communication ... 495
Summary of research on whistlers and related phenomena ... 642
Summary of VLF and ELF propagation research ... 647
Surface and leaky wave antennas ... 746
Surface-wave resonance effect in a reactive cylindrical structure excited by an axial line source ... 13
Swerling, P., Random processes ... 674
Swift, D. W., S. J. Fricker, R. P. Ingalls, W. C. Mason, M. L. Stone, Computation and measurement of the fading rate of moon-reflected UHF signals ... 455
System loss concept at ELF, possible application ... 413

Taylor, W. L., Daytime attenuation rates in the very-low-frequency band using atmospherics ... 349
Teletype, narrow-band, message errors on a single-sideband 600-mile-long ultrahigh-frequency tropospheric radio link, measured statistical characteristics ... 125
Terrestrial propagation of very-low-frequency radio waves—a theoretical investigation ... 153
Test of the equivalence theorem for sporadic *E* propagation, note ... 347
Thayer, G. D., R. R. Bean, R. A. Cahoon, Methods of predicting the atmospheric bending of radio rays ... 487
Theorem for sporadic *E* propagation, note on a test of the equivalence ... 347
Theory and coding, information ... 671
Theory, circuit ... 687
Theory, coherence, bibliography ... 742
Theory, cylindrical antenna ... 569
Theory, detection ... 678
Theory of corrugated guides, a contribution ... 533
Theory of radar scattering by the moon ... 217
Theory of reflection of low- and very-low-radiofrequency waves from the ionosphere ... 269
Theory of wave propagation through a concentrically stratified troposphere with a smooth profile ... 467
Theory of wavelength dependence in ultrahigh frequency transhorizon propagation based on meteorological considerations ... 231
Thompson, M. C., Jr., Measurements of physical quantities by radio techniques ... 605
